Good introductory textbook

By Sara

We used this text in my graduate level diversity class. This text is a good introduction to working with diverse groups. The chapters are set up so that each chapter provides an overview of a different group (Women, Asian-Americans, African Americans, Native Americans, etc.). The only thing that bothered me was the editor's adamant usage of the phrases "hers or his" and "she and he" (rather than "his or hers" and "he and she," as it's usually said). I understand they are trying to be culturally sensitive, but I just thought it was pushing it too much.

Great book

By BJ Watson

I purchased this for my Cultural Competence in the Helping Professions course. I have always considered myself a culturally aware person, but have often struggled with what is called "Cultural Competency" because I think many of the things that you need to know to be "culturally competent" involve what I feel are a lot of stereotypes. However, this book addresses that way of thinking, and I thought this was both informative and helpful. Anyone interested in working with people who are different than you (male, female, straight, gay, old, young, black, white, etc.) and want to do the best you can at making the person feel welcome and that they belong, should read this book.

I started purchasing as many textbooks as possible on the Kindle because I have found that it saves a significant amount of money. Last semester I took 4 classes, and saved over \$200 because I bought all my textbooks on Kindle instead of purchasing Used copies from the University Bookstore. This textbook is one of the best Kindle books I have seen so far in terms of formatting and ease of use for Kindle.

Good luck!

The authors take advantage of the fact that they have ...

By Amazon Customer

The authors take advantage of the fact that they have a platform to recruit and influence students. They are not objective. They should be more forthright and openly admit that they have a political and cultural agenda. Much of the book is basically propaganda that utilizes selected research to support a preferred narrative. Throughout the text they make very broad characterizations and absurd comments that are laughable. It's as if they are writing to aliens from another planet who know very little about real life on planet earth.
