## DESIGNING DESIGN

### KENYA HARA

#### Lidewij EDELKOORT *Creator*

Many electrical appliances are left connected to the power socket, always consuming small amounts of electric energy. To turn the appliance completely OFF the plug must be unplugged. However, that creates a chaotic mass of 'fallen plugs' around the power socket. The Gold winning entry treats this condition in a positive and fresh manner to correspond to the user's attention toward the means of communication which gives a situation a meaning.

#### Olafur ELIASSON *Artist*

It is no easy task using something 'elementary' with great ingenuity. As a result, many applicants ended up making designs which would convey some sort of message corresponding to signs that are small and apply minimal functionality. Opinions were greatly divided among the judges on whether or not to select designs that include some kind of message. I think this competition and the entire experience examine its own stance.

#### Lars Müller Publishers

#### Jasper MORRISON *Product designer*

A great many projects showed plenty of understanding of the Muji spirit. There was plenty of lively debate among the jurors about which 15 should be chosen and an even more lively debate about the winning entry. Personally it was not my favourite, and although I could appreciate why others liked it I felt it lacked a real function, and that the symbolic function it represented was too far from the everyday practicalities which Muji deals with.

#### Naoto FUKASAWA *Product Designer*

In the words of the late graphic designer Ikko Tanaka, "Simplicity should not be made inferior to extravagance. Rather, it should be that in such world of pride, by expanding such value system one can enrich life with as little resources as possible." We believe that the examination of "places that evade the conscious eye" as part of the theme of this first "SUMI" (a foundation of better living for people on Earth, of universality. We sincerely thank everyone who has sent in their designs.

Representing a new generation of designers in Japan, Kenya Hara (born 1958) pays tribute to his mentors, using long overlooked Japanese icons and images in much of his work. In *Designing Design*, he impresses upon the reader the importance of "emptiness" in both the visual and philosophical traditions of Japan, and its application to design, made visible by means of numerous examples from his own work: Hara for instance designed the opening and closing ceremony programs for the Nagano Winter Olympic games 1998. In 2001, he enrolled as a board member for the Japanese label MUJI and has considerably moulded the identity of this successful corporation as communication and design advisor ever since. Kenya Hara, among the leading design personalities in Japan, has also called attention to himself with exhibitions such as *Re-Design: the Daily products of the 21st Century of 2000*.

5 of 5 people found the following review helpful.

A Good Read, But 'White' is More Concentrated and Concise

By W. Stotler

This lengthy book isn't needed if you read Hara's book, 'White', which neatly summarizes his philosophy and approach to design. I've given this four stars instead of five simply for length. Hara is at his best when he's working in a concise form (IMO). If you are thinking about this book, check out 'White' first. If you really liked White (like I did) then this is the next step, although much of the material will be repeated and illustrated with case studies that may (or may not) add value for you.

Excellent Design Book.

By D. Barrett

Love this book. Tons of photos, illustrations, lots of insight into the Japanese aesthetic. Makes a great argument about how the Japanese and NOT the Swiss invented modern design.

Get it.

By Ben Craven

If you're looking at this book, then you already have an idea of what to expect. Get it.
