Taught me better than my professor did
By Melanie Vumbaca
I really do not love math at all, however, considering I used this for an online class, I really learned everything from my math lab and this text. The professor did not teach us a thing, and the course was all reading, videos, and quizzes and tests, and somehow I still managed to get an A in the class with what I learned on my own from MyMathLab.

Valuable Companion
By eelizabeth
This book has been able to help me not only just do the work at hand, but allowed me to understand the material in greater detail. Without this I would have very lost in the class.
