When it comes to cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body - and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person - and because of this, the outcomes in conventional medicine can be bleak.

But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer - and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing - from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team.

Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just the tumor. *The Cancer Revolution* will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.

Amazing book!

By pavnaim

Dr Connealy has been my doctor for thirty years. She has always been ahead of the curve...I truly consider her a gift from God. Much of what is in this book, I've been doing for years under her guidance, but it is also chock full of new information. I will use this as a reference guide for healthy living. While I see it as an important book for anyone fighting cancer, it is equally significant as a manual to prevent this hideous disease.

411 on all things cancer

By michael broussard

I was looking for a book to learn about how to prevent cancer. I am at an age now where I realize that I need to take steps in order to protect my health. Cancer always seemed like a death sentence to me-but after reading this book there were are many things you could do to either prepare for it or deal with it once it struck.

I could not believe all the info that this book delivered. The tests that you can take to predict the likelihood of cancers blew me away. It is a must read for anyone that is trying to educate themselves on all things cancer.

Get this book if you want to know what's the 411. It's fascinating.

A New Cancer Approach

By Elise Schopper-Brigel

With cancer being so prevalent in our world today, *The Cancer Revolution* is required reading for everyone. Dr. Connealy outlines many steps you can take to prevent cancer from happening in the first place and it

goes much deeper than simply eating and living a clean life. There are tests that can be conducted that pick up the early warning signs. If you have been diagnosed with cancer it also covers everything from chemo to more integrative approaches on how to deal with it. The Cancer Revolution is groundbreaking information for anyone who wants to prevent cancer or is diagnosed with cancer. How blessed we are to have talents like Dr. Leigh Erin Connealy who are willing to share their genius with us.
