So, it allows you read it almost everywhere you have willingness to check out **The New Moon: Water, Exploration, And Future Habitation By Arlin Crotts**

THE NEW MOON: WATER, EXPLORATION, AND FUTURE HABITATION BY ARLIN CROTTS PDF

Explore Earth's closest neighbor, the Moon, in this fascinating and timely book and discover what we should expect from this seemingly familiar but strange, new frontier. What startling discoveries are being uncovered on the Moon? What will these tell us about our place in the Universe? How can exploring the Moon benefit development on Earth? Discover the role of the Moon in Earth's past and present; read about the lunar environment and how it could be made more habitable for humans; consider whether continued exploration of the Moon is justified; and view rare Apollo-era photos and film stills. This is a complete story of the human lunar experience, presenting many interesting but little-known and significant events in lunar science for the first time. It will appeal to anyone wanting to know more about the stunning discoveries being uncovered on the Moon.

Everything moon but too scholarly

By Steve G

I gave this book the rating I did because it is a veritable storehouse of everything moon. The earlier chapters on the history of lunar exploration, NASA and international cooperation are fascinating, but overly detailed. Around chapter 7, the book got so bogged down in the details that I stopped reading. It appears that the authors made certain assumptions about how familiar the reader will be familiar with geology and thus I spent a lot of time looking things up, which made it harder to follow the story. The language of the book was scholarly and so not written for the casual reader. I think that readers who want detailed, textbook-like information on the moon will love the book. Casual readers however will quickly get bogged down and I don't recommend it for these readers.

The Moon: how we got there and what we found

By Charles J Byrne

This is a well-researched source of the evolving history of lunar exploration, with extensive story of the human background of the programs as well as the scientific results.

Want to meet the real Moon?

By Zsuzsanna Marka

Fascinating book full of hard to get information and intriguing stories!

Even the glossary at the end of the book is very interesting and helpful to browse.
